adelekeelijah24@gmail.com

I am a Frontend Developer with 3+ years of experience, building responsive, high-performance web applications using React, JavaScript, and modern CSS frameworks. Proven ability to improve site performance by up to 40% through code optimization and best practices. Strong collaborator with UX and backend teams to deliver intuitive, business-driven user experiences. Focused on scalable, component-based development and efficient state management.

WORK EXPERIENCE

Frontend Developer (Freelance)

LuxeWardrobe Co., Lagos, Jan 2024 - Mar 2024

- Designed a visually engaging, conversion-focused landing page using **Next.js** and **Tailwind CSS**, adhering to modern UX/UI principles.
- Implemented **fully responsive layouts** optimized for all screen sizes, ensuring seamless user experience across mobile, tablet, and desktop devices.
- Developed reusable components (e.g., hero sections, testimonials, pricing cards) using a **component-driven architecture** for scalability and maintainability.
- Conducted **A/B testing** on call-to-action (CTA) buttons and section placements to improve user engagement and boost conversion rate by 18%.
- Integrated **Google Analytics and Hotjar** to gather user behavior data, informing further design iterations based on real interaction metrics.

Portfolio Website for Photographer

FrameShot Studios, Abuja, Jul 2023 - Aug 2023

- Built a sleek, responsive portfolio website using **React** and **Framer Motion**, featuring smooth page transitions and animated galleries to showcase high-resolution images.
- Integrated **Sanity.io** as a headless CMS, enabling the client to easily manage and update portfolio content, blog posts, and image metadata without developer assistance.
- Optimized performance with **lazy loading** for images and code splitting, reducing initial load time and improving overall user experience on both desktop and mobile.

Restaurant Menu Web App

UrbanSpice Kitchen, Asaba, Feb 2025 - May 2025

- Developed a fully responsive, interactive restaurant menu using **React** and **styled-components**, allowing users to seamlessly browse categories, view dish details, and filter by dietary preferences.
- Integrated a **headless CMS (Sanity.io)** to enable real-time content updates, allowing restaurant staff to modify menu items, pricing, and availability without developer input.
- Enhanced user experience with **smooth animations**, dynamic transitions, and conditional rendering, ensuring fast performance and mobile-first usability across all devices.

EDUCATION

Bachelor of Science Civil Engineer

Federal University Oye-Ekiti 2019 - Jul 2024
Second Class (Upper Division) in Civil Engineering.

KEY SKILLS

Tech Stack

React	Tailwind	TypeScript
Sanity/Firebase
